TOMOE'S COLUMN

We have earned trust from many clients with high technical skills of designing and processing stainless items.

As one of the largest empty column makers, we use such technical skills and provide HPLC empty columns to our clients. Our products have been used successfully in several areas of all Japanese packed column makers.

Not only HPLC stainless columns, we have a large assortment of IC-PEEK columns, SPE-PP columns, etc.

Please try our Made-in-Japan high quality and careful support. We look forward to developing great partnership with our clients in all over the world.
